1995 ANNUAL INDEXES

Textile Research Journal

Volume 65

AUTHOR AND TITLE INDEX, pp. 776–781

MONTH	PAGES
January	1–60
February	61–122
March	123–184
April	185–246
May	247–308
June	309–370

SUBJECT INDEX, pp. 782–789

MONTH	PAGES
July	371–432
August	433–494
September	495–556
October	557–618
November	619–696
December	697–790

AUTHOR AND TITLE INDEX

Abbott, G. M. An Automated Color-Sorting Device for Wool and Other Fibers 331

Acar, M. Effects of Opening Roller Speed on the Fiber and Yarn Properties in Open-End Friction Spinning (*Ülkü, Özipek*) 557

Reply to "Comments on 'Effects of Geometry on the Flow Characteristics and Texturing Performance of Air-Jet Texturing Nozzles' " (*Versteeg*) 556

Adams, David L. Yarn Strength Prediction Using Neural Networks Part I: Fiber Properties and Yarn Strength Relationship (*Cheng*) 495

Allen, S. J. Microbial Damage to Cotton (*Auer, Pailthorpe*) 379

Amirbayat, J. Surface Attrition of Worsted Fabrics (*Bozzalta*) 760

Amirshahi, S. H. An Algorithm for Optimizing Color Prediction in Blends (*Pailthorpe*) 632

Anandjiwala, Rajesh D. Tensile Properties and Static Fatigue Behavior of Cotton Warp Yarns (*Carmical, Goswami*) 131

Arora, Manpreet S. Dimensionless Groups for the Equilibrium Sorption of Polysulfonated Acid Dyes by Polyamides (*McGregor*) 385

Auer, P. D. Effect of Topical Applications of Antioxidants and Quenchers on the Photoyellowing of Fluorescently Whitened Wool Fabric (*Pailthorpe*) 287

Microbial Damage to Cotton (*Allen, Pailthorpe*) 379

Backer, Stanley Structural Modeling of Double-Braided Synthetic Fiber Ropes (*Wu, Seo, Mandell*) 619

Bassam, S. J. Dynamic Reciprocating Bending Fatigue of Webbing (*Johnson*) 49

Batra, Subhash, K. An Integrated Approach to Dynamic Analysis of the Ring Spinning Process Part IV: Inherent Instability of the Free Balloon (*Ghosh, Zeng, Robert, Fraser*) 417

Borsa, Judit Fibrous Carboxymethylcellulose by Pad Roll Technology (*Rácz, Deák*) 348

Boullart, L. Self-Organizing Neural Nets: A New Approach to Quality in Textiles (*Sette, Kiekens*) 196

Boylston, E. K. The Primary Wall of Cotton Fibers (*Hebert*) 429

Bozzalta, G. Surface Attrition of Worsted Fabrics (*Amirbayat*) 760

Bresee, Randall R. Fabric Defect Detection and Classification Using Image Analysis (*Zhang*) 1

Broadbent, Arthur D. Analysis of the Performance of a Textile Vacuum Extractor (*Kong*) 486

Buckenham, P. Heat and Moisture Transfer in Textile Assemblies Part II: Steaming of Blended and Interleaved Fabric-Wrapper Assemblies (*Le, Tester, Postle*) 265

Bukošek, Vili Influence of Opening Force During OE Spinning on Fiber Geometry (*Nikolić*) 652

Bullerwell, Arthur C. Analysis of Beat-up Force During Weaving (*Shih, Mohamed, Dao*) 747

Byrne, K. X-Ray Photoelectron Spectroscopic Study of Wool Modified by Gaseous Fluorine (*Kidd, Carr, Dodd, Vickerman*) 504

Cai, Zhong A Nonlinear Viscoelastic Model for Describing the Deformation Behavior of Braided Fiber Seals ... 461

Cano-Suárez, A. Effect of Ethyl Xanthogenate on the Absorption of a Cationic Dye on Polyester Fibers: Zeta Potential and Sorption Thermodynamics (*Espinosa-Jiménez*) 171

Carmical, Mike Tensile Properties and Static Fatigue Behavior of Cotton Warp Yarns (*Anandjiwala, Goswami*) ... 131

Carr, C. M. X-Ray Photoelectron Spectroscopic Study of Wool Modified by Gaseous Fluorine (*Kidd, Dodd, Vickerman, Byrne*) 504

Carrión Fité, F. J. Dyeing Polyester at Low Temperatures: Kinetics of Dyeing with Disperse Dyes 362

Chand, Subhash Comments on "Effects of Geometry on the Flow Characteristics and Texturing Performance of Air-Jet Texturing Nozzles" 555

Chen, Bijian A Physically Based Model of Fabric Drape Using Flexible Shell Theory (*Govindaraj*) 324

Chen, Cheng-Chi Crosslinking Cotton Fabric with DMDM-DHEU Using Water/Methanol Mixtures as Solvents (*Hsiung*) 607

Chen, Wan-Ling A Simple Preparative Method for Cross-Sectioning Fibrous Materials for Optical Microscopy (*Fujishige*) 369

Cheng, Luo Yarn Strength Prediction Using Neural Networks Part I: Fiber Properties and Yarn Strength Relationship (*Adams*) 495

Cherkassky, Arkady Analysis of the Smoothing Effect of the Card Cylinder Using Simulation 723

Chikkodi, Shridhar V. Effects of Biofinishing on Cotton/Wool Blended Fabrics (*Khan, Mehta*) 564

Chou, Shen Effect of Brominated Flame Retardants on the Properties of Acrylonitrile/Vinyl Acetate Copolymer Fibers (*Wu*) 533

Chen, Wan-Ling A Simple Preparative Method for Cross-Sectioning Fibrous Materials for Optical Microscopy (*Fujishige*) 369

Cheng, Luo Yarn Strength Prediction Using Neural Networks Part I: Fiber Properties and Yarn Strength Relationship (*Adams*) 495

Cherkassky, Arkady Analysis of the Smoothing Effect of the Card Cylinder Using Simulation 723

Chikkodi, Shridhar V. Effects of Biofinishing on Cotton/Wool Blended Fabrics (*Khan, Mehta*) 564

Chou, Shen Effect of Brominated Flame Retardants on the Properties of Acrylonitrile/Vinyl Acetate Copolymer Fibers (*Wu*) 533

Chudleigh, P. W. The Optics of the Wool Fiber Diameter Analyzer (*Glass, Dabbs*) 85
Chun, David T. W. Endotoxin Reduction in Dust from Heated Cotton Fibers (*Rousselle*) 501
Coderch, L. Multilamellar Liposomes Including Cholesterol as Carriers of Azobenzene Disperse Dyes in Wool Dyeing (*de la Maza, Manich, Parra*) 163
Craft, Stephanie Uniformity and Softness of Kenaf Fibers for Textile Products (*Ramaswamy, Wartelle*) 765

Dabbs, T. P. The Optics of the Wool Fiber Diameter Analyzer (*Glass, Chudleigh*) 85
Dao, Dekun Analysis of Beat-up Force During Weaving (*Shih, Mohamed, Bullerwell*) 747
Deák, András Fibrous Carboxymethylcellulose by Pad Roll Technology (*Rácz, Borsa*) 348
de la Maza, A. Multilamellar Liposomes Including Cholesterol as Carriers of Azobenzene Disperse Dyes in Wool Dyeing (*Manich, Coderch, Parra*) 163
DeLucca, Anthony J. Biodeterioration of Nonwoven Fabrics (*Goynes, Moreau, Ingber*) 489
Denning, R. J. Response to Letters from Peet *et al.* and Zahn *et al.* (*Guise, Evans, St John*) 60
Dodd, K. J. X-Ray Photoelectron Spectroscopic Study of Wool Modified by Gaseous Fluorine (*Kidd, Carr, Vickerman, Byrne*) 504
Dorrity, J. L. Determining the Heat-Set Temperature for Poly(ethylene Terephthalate) Carpet Yarn with Near-Infrared Reflectance Spectroscopy (*Kumar, Tincher*) 583
Dupuis, Dominique Compression of Greystate Fabrics as a Function of Yarn Structure (*Popov, Viallier*) 309

El Mogahzy, Yehia E. Theory and Practice of Cotton Fiber Selection Part I: Fiber Selection Techniques and Bale Picking Algorithms (*Gowayed*) 32
Part II: Sources of Cotton Mix Variability and Critical Factors Affecting It (*Gowayed*) 75
El-Shiekh, Aly Mechanics of Woven Fabrics Part V: Impact of Weavability Limit Parameters on Properties of Fabrics from Yarns with Thickness Variation (*Seyam*) 14
Espinosa-Jiménez, M. Effect of Ethyl Xanthogenate on the Absorption of a Cationic Dye on Polyester Fibers: Zeta Potential and Sorption Thermodynamics (*Cano-Suárez*) 171
Evans, David J. Analysis of Crosslinked Silicones on Wool by Atomic Absorption Spectroscopy 118
Response to Letters from Peet *et al.* and Zahn *et al.* (*Denning, Guise, St John*) 60

Falkner, A. H. Reply to Professor Miao's Comments 428
Fiest, Jack R. A Technical Approach to Characterizing Perceived Walking Comfort of Carpet (*Norton, Orofino*) 527
Fraser, W. Barrie An Integrated Approach to Dynamic Analysis of the Ring Spinning Process Part IV: Inherent Instability of the Free Balloon (*Batra, Ghosh, Zeng, Robert*) 417
Frydrych, Iwona Relation of Single Fiber and Bundle Strengths of Cotton 513
Fujimatsu, Hitoshi Influence of a Quaternary Ammonium Surfactant on Alkaline Hydrolysis of Heat-Set Poly(ethylene Terephthalate) Fibers (*Niu, Wakida, Ogasawara, Takekoshi*) 771
Fujishige, S. A Simple Preparative Method for Cross-Sectioning Fibrous Materials for Optical Microscopy (*Chen*) 369
Fukunishi, Koushi A Simulated Evaluation of Photofading of Crystal Violet in Polymer Substrates (*Toda, Hida*) 507

Gan, L. A Study of Fabric Deformation Using Nonlinear Finite Elements (*Ly, Steven*) 660
Garcia, J. Changes in the Chemical Composition on Wool During Dyeing and Finishing and Their Effects on Fabric Properties (*Postle, Pailthorpe*) 477
Ghiggino, Kenneth P. Confocal Laser Raman Microprobe Studies of Keratin Fibers (*Jurdana, Nugent*) 593
Ghosh, Subhas Influence of Waste Polymer Inclusion on the Performance of Oriented Polypropylene Geotextile Tapes Part I: Effect on Tensile Properties (*Horrocks, Richards*) 601
Ghosh, Tushar K. Analysis of Fabric Deformation in a Roll-Making Operation Part IV: Effect of Varying Winding Tension (*Peng*) 739
An Integrated Approach to Dynamic Analysis of the Ring Spinning Process Part IV: Inherent Instability of the Free Balloon (*Batra, Zeng, Robert, Fraser*) 417
Glass, M. The Optics of the Wool Fiber Diameter Analyzer (*Dabbs, Chudleigh*) 85
Gong, R. H. Quality Measurement of Knitted Apparel Fabrics 544
Goswami, Bhuvenesh C. Tensile Properties and Static Fatigue Behavior of Cotton Warp Yarns (*Anandjiwala, Carmical*) 131
Govindaraj, Muthu A Physically Based Model of Fabric Drape Using Flexible Shell Theory (*Chen*) 324
Gowayed, Yasser Theory and Practice of Cotton Fiber Selection Part I: Fiber Selection Techniques and Bale Picking Algorithms (*El Mogahzy*) 32
Part II: Sources of Cotton Mix Variability and Critical Factors Affecting It (*El Mogahzy*) 75
Goynes, Wilton R. Biodeterioration of Nonwoven Fabrics (*Moreau, DeLuca, Ingber*) 489
Cotton Fiber Secondary Wall Development—Time Versus Thickness (*Ingber, Triplett*) 400
Introductory Study of Structures of Cotton Motes and Mote Fibers (*Ingber, Thibodeaux*) 219
Grant, J. Wallace Mechanics of a Hybrid Circular Braid with an Elastic Core (*Hopper, Popper*) 709
Grayston, G. F. Visible/Near Infrared Spectroscopy of Scoured Wool (*Hammersley, Townsend, Ranford*) 241
Guise, G. B. Response to Letters from Peet *et al.* and Zahn *et al.* (*Denning, Evans, St John*) 60
Gutierrez, Hector M. Modeling and Simulation for Control in Carding (*Rust, Seyam*) 638

Hammersley, M. J. Visible/Near Infrared Spectroscopy of Scoured Wool (*Townsend, Grayston, Ranford*) 241
Harlock, S. C. A Computer-Aided Grading System for Both Basic Block and Adapted Clothing Patterns Part I: Establishing the Grade Rule Data File (*Liu*) 10
Part II: The Grading Algorithms (*Liu*) 95
Part III: The AutoGrader System (*Liu*) 157
Harlow, D. G. Asymptotic Approximations Used in Probabilistic Failure Modeling of Woven Fiber Networks (*Laumakis*) 731
Probability Failure Modeling of Woven Fiber Networks (*Laumakis*) 254
Hartzell, M. M. A Developmental Study of Single Fiber Strength: Greenhouse Grown SJ-2 Acala Cotton (*Hsieh, Honik*) 101
Hebert, Jacques J. A New Single Fiber Tensile Tester (*Thibodeaux, Shofner, Singletary, Patelke*) 440
The Primary Wall of Cotton Fibers (*Boylston*) 429
Hesse, Andrea Zero-AOX Shrinkproofing Treatment for Wool Top and Fabric Part I: Glow Discharge Treatment (*Thomas, Höcker*) 355
Part II: Collagen Resin Application (*Thomas, Höcker*) 371
Hida, Mitsuhiko A Simulated Evaluation of Photofading of Crystal Violet in Polymer Substrates (*Toda, Fukunishi*) 507

Höcker, Hartwig Cell Membrane Lipids of Wool and Human Hair Form Liposomes (*Körner, Petrovic*) 56
Zero-AOX Shrinkproofing Treatment for Wool Top and Fabric Part I: Glow Discharge Treatment (*Hesse, Thomas*) 355
Part II: Collagen Resin Application (*Hesse, Thomas*) .. 371
Holcombe, B. V. Fiber Hygroscopicity and Perceptions of Dampness Part I: Subjective Trials (*Plante, Stephens*) 293
Part II: Physical Mechanisms (*Li, Plante*) 316
Holweg, Ronald B. M. Bubble Size Distribution During Application of Foam to Fabrics and Its Effects on Product Quality (*Isarin, Kaasjager*) 61
Honik, E. A Developmental Study of Single Fiber Strength: Greenhouse Grown SJ-2 Acala Cotton (*Hsieh, Hartzell*) 101
Hopper, Robert H., Jr. Mechanics of a Hybrid Circular Braid with an Elastic Core (*Grant, Popper*) 709
Horr, T. J. Imaging Wool Fiber Surfaces with a Scanning Force Microscope (*Phillips, Huson, Turner, Shanks*) 445
Horrocks, A. Richard Influence of Waste Polymer Inclusion on the Performance of Oriented Polypropylene Geotextile Tapes Part I: Effect on Tensile Properties (*Richards, Ghosh*) 601
Hsieh, You-Lo A Development of Single Fiber Strength: Greenhouse Grown SJ-2 Acala Cotton (*Honik, Hartzell*) 101
Liquid Transport in Fabric Structures 299
Hsiung, Han Hsing Crosslinking Cotton Fabric with DMDM DHEU Using Water/Methanol Mixtures as Solvents (*Chen*) 607
Huson, M. G. Imaging Wool Fiber Surfaces with a Scanning Force Microscope (*Phillips, Horr, Turner, Shanks*) 445
Hwang, Kuen-Shan Effect of Water on High-Strength and High-Modulus Poly(vinyl Alcohol) Fibers from Crosslinking Wet Spinning/Multistep Drawing (*Lin, Lin*) 278

Ichida, Masatoshi Structure and Chemical Composition of Silk Proteins in Relation to Silkworm Diet (*Ito, Muraoka, Yamazaki, Imamura, Mori, Sumida, Matsubara*) 755
Imamura, Toshikatsu Structure and Chemical Composition of Silk Proteins in Relation to Silkworm Diet (*Ito, Muraoka, Yamazaki, Mori, Ichida, Sumida, Matsubara*) 755
Ingber, Bruce F. Biodeterioration of Nonwoven Fabrics (*Goynes, Moreau, DeLucca*) 489
Cotton Fiber Secondary Wall Development—Time Versus Thickness (*Goynes, Triplett*) 400
Introductory Study of Structures of Cotton Motes and Mote Fibers (*Goynes, Thibodeaux*) 219
Inoue, Kiyohiro Fiber Crimp Analysis by Fractal Dimension (*Muraoka, Tagaya, Nishizawa*) 454
Isarin, Jan-Cor Bubble Size Distribution During Application of Foam to Fabrics and Its Effects on Product Quality (*Kaasjager, Holweg*) 61
Ito, Hiraku Structure and Chemical Composition of Silk Proteins in Relation to Silkworm Diet (*Muraoka, Yamazaki, Imamura, Mori, Ichida, Sumida, Matsubara*) 755
Ivanov, Andrey A. Near-IR Spectrophotometric Techniques for Fast Identification of Carboxycellulose in Linen Fibers—A Preliminary Report (*Kouznetsov*) 236

Jasper, Warren J. Image Analysis of Mispicks in Woven Fabric (*Potlapalli*) 683
Jeddi, A. A. A. The Potential of False Twist to Assist in Handling Low Strength Cotton Slivers (*Oxenham*) 423
Jocić, Dragan Conductivity Measurement—A Simple Method for Determining Dye/Surfactant Interaction 409
Johnson, Nigel A. G. Dynamic Reciprocating Bending Fatigue of Webbing (*Bassam*) 49
Johnson, Roy H. Tensile Properties of Textured Polyester Woven Fabrics: Theoretical Model for Plain Weave Fabric (*Salem, Mohamed*) 185
Jordan, Sheri L. Extracting and Quantifying a Polyester Fiber Finish Using On-line SFE/FT-IR with Intermediate Trapping (*Taylor, Seemuth*) 230
Jurdana, Lucia E. Confocal Laser Raman Microprobe Studies of Keratin Fibers (*Ghiggino, Nugent*) 593

Kaasjager, Antonie D. J. Bubble Size Distribution During Application of Foam to Fabrics and Its Effects on Product Quality (*Isarin, Holweg*) 61
Khan, Samina Effects of Biofinishing on Cotton/Wool Blended Fabrics (*Chikkodi, Mehta*) 564
Kidd, B. X-Ray Photoelectron Spectroscopic Study of Wool Modified by Gaseous Fluorine (*Carr, Dodd, Vickerman, Byrne*) 504
Kiekens, Paul Self-Organizing Neural Nets: A New Approach to Quality in Textiles (*Sette, Boullart*) 196
Test Method for Cloth Fell Displacement Caused by Relaxation (*Vangheluwe*) 540
Kimmel, Linda B. Selected Properties of Predominantly Cotton Staple-Core Knitted Fabrics (*Sawhney*) 587
Tandem Spinning (*Sawhney*) 550
Kokot, Serge An Exploratory Study of Mercerized Cotton Fabrics by DRIFT Spectroscopy and Chemometrics (*Stewart*) 643
Konda, Fujio Analysis of Blend Irregularity in Yarns Using Image Processing Part III: Evaluation of Blend Irregularity by Line Sense and Its Application to Actual Blended Yarns (*Watanabe, Kurosaki, Nishimura*) .. 392
Kong, Xiaosing Analysis of the Performance of a Textile Vacuum Extractor (*Broadbent*) 486
Körner, A. Cell Membrane Lipids of Wool and Human Hair Form Liposomes (*Petrovic, Höcker*) 56
Kothari, V. K. Mechanism of Nep Formation in Air-Jet Texturing (*Sengupta, Sensarma*) 273
Nep Level as an Index of the Structural Inhomogeneity of Air-Jet Textured Yarn (*Sengupta, Sensarma*) 339
Kouznetsov, Dmitri A. Near-IR Spectrophotometric Techniques for Fast Identification of Carboxycellulose in Linen Fibers—A Preliminary Report (*Ivanov*) 236
Kumar, A. Determining the Heat-Set Temperature for Poly(ethylene Terephthalate) Carpet Yarn with Near-Infrared Reflectance Spectroscopy (*Dorrity, Tincher*) 583
Kurosaki, Shi-Nya Analysis of Blend Irregularity in Yarns Using Image Processing Part III: Evaluation of Blend Irregularity by Line Sense and Its Application to Actual Blended Yarns (*Watanabe, Konda, Nishimura*) 392

Laumakis, P. J. Asymptotic Approximations Used in Probabilistic Failure Modeling of Woven Fiber Networks (*Harlow*) 731
Probability Failure Modeling of Woven Fiber Networks (*Harlow*) 254
Le, C. V. Heat and Moisture Transfer in Textile Assemblies Part I: Steaming of Wool, Cotton, Nylon, and Polyester Fabric Beds (*Ly, Postle*) 203
Part II: Steaming of Blended and Interleaved Fabric-Wrapper Assemblies (*Tester, Buckenham, Postle*) .. 265
Lee, Jiunn-yih Effect of Oil on Spread Width of Composite Yarn (*Wu*) 343
Effects of Spread Width on the Structure, Properties, and Production of a Composite Yarn (*Wu*) 225
Twist in the Spinning of a Composite Yarn (*Wu*) 522
Li, Fanting Diffusion and Microporous Structure of Acrylic Blend Fibers During the Coagulation Process (*Qin, Liu, Pan*) 570

Li, Y. Fiber Hygroscopicity and Perceptions of Dampness Part II: Physical Mechanisms (*Plante, Holcombe*) .. 316
Lin, Chin-An Effect of Water on High-Strength and High-Modulus Poly(vinyl Alcohol) Fibers from Crosslinking Wet Spinning/Multistep Drawing (*Hwang, Lin*) 278
Lin, Chung-Hua Applying an Artificial Neural Network to Pattern Recognition in Fabric Defects (*Tsai, Lin*) .. 123
Applying Expert System and Fuzzy Logic to an Intelligent Diagnosis System for Fabric Inspection (*Lin, Tsai*) 697
Effect of Water on High-Strength and High-Modulus Poly(vinyl Alcohol) Fibers from Crosslinking Wet Spinning/Multistep Drawing (*Lin, Hwang*) 278
Lin, Jeng-Jong Applying an Artificial Neural Network to Pattern Recognition in Fabric Defects (*Tsai, Lin*) .. 123
Applying Expert System and Fuzzy Logic to an Intelligent Diagnosis System for Fabric Inspection (*Lin, Tsai*) 697
Liu, Z. A Computer-Aided Grading System for Both Basic Block and Adapted Clothing Patterns Part I: Establishing the Grade Rule Data File (*Harlock*) 10
Part II: The Grading Algorithms (*Harlock*) 95
Part III: The AutoGrader System (*Harlock*) 157
Liu, Zhaofeng Diffusion and Microporous Structure of Acrylic Blend Fibers During the Coagulation Process (*Qin, Pan, Li*) 570
Ly, N. G. A Study of Fabric Deformation Using Nonlinear Finite Elements (*Gan, Steven*) 660
Heat and Moisture Transfer in Textile Assemblies Part I: Steaming of Wool, Cotton, Nylon, and Polyester Fabric Beds (*Le, Postle*) 203

Mandell, John F. Structural Modeling of Double-Braided Synthetic Fiber Ropes (*Wu, Seo, Backer*) 619
Manich, A. M. Multilamellar Liposomes Including Cholesterol as Carriers of Azobenzene Disperse Dyes in Wool Dyeing (*de la Maza, Coderich, Parra*) 163
Matsubara, Fujiyoshi Structure and Chemical Composition of Silk Proteins in Relation to Silkworm Diet (*Ito, Muraoka, Yamazaki, Imamura, Mori, Ichida, Sumida*) 755
McGregor, Ralph Dimensionless Groups for the Equilibrium Sorption of Polysulfonated Acid Dyes by Polyamides (*Arora*) 385
Mehta, R. D. Effects of Biofinishing on Cotton/Wool Blended Fabrics (*Chikkodi, Khan*) 564
Miao, Menghe Air Interlaced Yarn Structure and Properties (*Soong*) 433
Winding Tension Variation and Evaluation of Compensation Bar Design 427
Miwa, Minoru Fatigue Behavior of Aramid Nonwoven Fabrics Under Hot-Press Conditions Part I: Mechanical Properties (*Watanabe, Takeno, Yokoi*) 213
Part II: Geometric Structure of Fiber Cross Sections (*Watanabe, Takeno, Yokoi*) 247
Mohamed, Mansour, H. Analysis of Beat-up Force During Weaving (*Shih, Bullerwell, Dao*) 747
Tensile Properties of Textured Polyester Woven Fabrics: Theoretical Model for Plain Weave Fabric (*Salem, Johnson*) 185
Moreau, Jerry P. Biodeterioration of Nonwoven Fabrics (*Goynes, DeLucca, Ingber*) 489
Mori, Hajime Structure and Chemical Composition of Silk Proteins in Relation to Silkworm Diet (*Ito, Muraoka, Yamazaki, Imamura, Ichida, Sumida, Matsubara*) 755
Mukhopadhyay, S. K. Structure-Property Relationships of PAN Precursor Fibers During Thermo-oxidative Stabilization (*Zhu*) 25
Muraoka, Yoichiro Fiber Crimp Analysis by Fractal Dimension (*Inoue, Tagaya, Nishizawa*) 454
Structure and Chemical Composition of Silk Proteins in Relation to Silkworm Diet (*Ito, Yamazaki, Imamura, Mori, Ichida, Sumida, Matsubara*) 755

Na, Youngjoo Assessing Wrinkling Using Image Analysis and Replicate Standards (*Pourdeyhimi*) 149
Nakamura, T. Dyeing Properties of Polyester Microfibers (*Ohwaki, Shibusawa*) 113
Nikolić, Momir Influence of Opening Force During OE Spinning on Fiber Geometry (*Bukošek*) 652
Nishimura, Yosiro Analysis of Blend Irregularity in Yarns Using Image Processing Part III: Evaluation of Blend Irregularity by Line Sense and Its Application to Actual Blended Yarns (*Watanabe, Konda, Kurosaki*) 392
Nishizawa, Kazuo Fiber Crimp Analysis by Fractal Dimension (*Muraoka, Inoue, Tagaya*) 454
Niu, Shouhua Influence of a Quaternary Ammonium Surfactant on Alkaline Hydrolysis of Heat-Set Poly(ethylene Terephthalate) Fibers (*Wakida, Ogasawara, Fujimatsu, Takekoshi*) 771
Nugent, Kerry W. Confocal Laser Raman Microprobe Studies of Keratin Fibers (*Jurdana, Ghiggino*) 593
Norton, Michael A. A Technical Approach to Characterizing Perceived Walking Comfort of Carpet (*Fiest, Orofino*) 527

Ogasawara, Shinji Influence of a Quaternary Ammonium Surfactant on Alkaline Hydrolysis of Heat-Set Poly(ethylene Terephthalate) Fibers (*Niu, Wakida, Fujimatsu, Takekoshi*) 771
Ohwaki, S. Dyeing Properties of Polyester Microfibers (*Nakamura, Shibusawa*) 113
Orofino, Thomas A. A Technical Approach to Characterizing Perceived Walking Comfort of Carpet (*Norton, Fiest*) 527
Oxenham, W. The Potential of False Twist to Assist in Handling Low Strength Cotton Slivers (*Jeddi*) 423
Özipek, B. Effects of Opening Roller Speed on the Fiber and Yarn Properties in Open-End Friction Spinning (*Ülkü, Acar*) 557

Pailthorpe, M. T. An Algorithm for Optimizing Color Prediction in Blends (*Amirshahi*) 632
Changes in the Chemical Composition of Wool During Dyeing and Finishing and Their Effects on Fabric Properties (*Garcia, Postle*) 477
Effect of Topical Applications of Antioxidants and Quenchers on the Photoyellowing of Fluorescently Whitened Wool Fabric (*Auer*) 287
Low Chrome Dyeing: Eliminationg Cr(VI) in the Exhausted Bath by Using Cr(III) as the Mordant (*Xing*) 70
Microbial Damage to Cotton (*Allen, Auer*) 379
Pan, Ding Diffusion and Microporous Structure of Acrylic Blend Fibers During the Coagulation Process (*Qin, Liu, Li*) 570
Pan, Ning Fiber Contact in Fiber Assemblies 618
Parra, J. L. Multilamellar Liposomes Including Cholesterol as Carriers of Azobenzene Disperse Dyes in Wool Dyeing (*de la Maza, Manich, Coderch*) 163
Patelke, David B. A New Single Fiber Tensile Tester (*Hebert, Thibodeaux, Shofner, Singletary*) 440
Peet, Daniel J. The Chemistry of the Cuticle Surface of Keratin Fibers (*Wettenhall, Rivet*) 58
Peng, H. Analysis of Fabric Deformation in a Roll-Making Operation Part IV: Effect of Varying Winding Tension (*Ghosh*) 739
Petrovic, S. Cell Membrane Lipids of Wool and Human Hair Form Liposomes (*Körner, Höcker*) 56
Phillips, T. L. Imaging Wool Fiber Surfaces with a Scanning Force Microscope (*Horr, Huson, Turner, Shanks*) .. 445
Phukan, Ava Rani Degree and Stability of the Flat Set of Plain Weft Knitted Fabrics Part I: Effect of Finishing Treatments (*Subramaniam*) 471

Plante, A. M. Fiber Hygroscopicity and Perceptions of Dampness Part I: Subjective Trials (*Holcombe, Stephens*) ... 293
Part II: Physical Mechanisms (*Holcombe*) ... 316
Popper, Peter Mechanics of a Hybrid Circular Braid with an Elastic Core (*Hopper, Grant*) ... 709
Popov, Gueorgui Compression of Greystate Fabrics as a Function of Yarn Structure (*Dupuis, Viallier*) ... 309
Potlapalli, Harsh Image Analysis of Mispicks in Woven Fabric (*Jasper*) ... 683
Postle, R. Changes in the Chemical Composition of Wool During Dyeing and Finishing and Their Effects on Fabric Properties (*Garcia, Pailthorpe*) ... 477
Heat and Moisture Transfer in Textile Assemblies Part I: Steaming of Wool, Cotton, Nylon, and Polyester Fabric Beds (*Le, Ly*) ... 203
Part II: Steaming of Blended and Interleaved Fabric-Wrapper Assemblies (*Le, Tester, Buckenham*) ... 265

SUBJECT INDEX

Acrylics
coagulation of blend fibers: diffusion and microporous structure *Qin, Liu, Pan, Li* 570
flame retardants on: effect of brominated retardants on fiber properties *Chou, Wu* 533
open-end friction spinning of: effects of opening roller speed on fiber and yarn properties *Ülkü, Özipek, Acar* ... 557
Antioxidants
on whitened wool: effect of antioxidants and quenchers on photoyellowing *Auer, Pailthorpe* 287
Aramids
fatigue behavior of: geometric structure of fiber cross sections *Watanabe, Miwa, Takeno, Yokoi* 247
nonwoven fabrics: fatigue behavior under hot-press conditions, mechanical properties *Watanabe, Miwa, Takeno, Yokoi* 213

Bacteria
microbial damage to cotton: review and evaluation of current tests *Allen, Auer, Pailthorpe* 379
Bast Fibers
kenaf: uniformity and softness of fibers for textile products *Ramaswamy, Craft, Wartelle* 765
Bending
bending fatigue of webbing: dynamic reciprocating fatigue tester for polyester webbing *Bassam, Johnson* 49
Biodegradation
of nonwovens: cotton and polypropylene *Goynes, Moreau, DeLucca, Ingber* 489
Blends
blend irregularity: evaluation by line sense and application to actual blends *Watanabe, Konda, Kurosaki, Nishimura* 392
color prediction in: algorithm for optimizing matching *Amirshahi, Pailthorpe* 632
of cotton fibers: cotton mix variability, sources and factors affecting it *El Mogahzy, Gowayed* 75
of cotton fibers: theory and practice of fiber selection, bale picking algorithms *El Mogahzy, Gowayed* 32
Braids
braided fiber seals: deformation behavior, nonlinear viscoelastic model *Cai* 461
double-braided ropes: structural modeling of synthetic fiber ropes *Wu, Seo, Backer, Mandell* 619
hybrid circular braid: elastic core, mechanics *Hopper, Grant, Popper* 709
Byssinosis
from heated cottons: endotoxin reduction in dust *Rousselle, Chun* 501

Capillarity
in fabric structures: liquid transport in cotton and polyester *Hsieh* 299
Carbon Fibers
PAN precursor fibers: structure-property relationships during thermo-oxidative stabilization *Mukhopadhyay, Zhu* 25
Carding
doffing comb: torsional vibrations of roller card doffing comb *Stadnicki, Wojciech* 614
modeling of: simulation for control *Gutierrez, Rust, Seyam* 638
smoothing effect: analysis using simulation *Cherkassky* 723
Carpets
carpet wear: self-organizing neural nets to evaluate textile quality *Sette, Boullart, Kiekens* 196
polyester yarn: determining heat-set temperature with NIR *Dorrity, Kumar, Tincher* 583
walking comfort of: polyurethane underlayment, perceived comfort *Norton, Fiest, Orofino* 527
Cellulosics
carboxycellulose in linen: near-IR spectrophotometric technique for fast identification *Kouznetsov, Ivanov* 236
carboxymethylcellulose: modified cotton by pad roll technology *Rácz, Deák, Borsa* 348
Clothing
wool knits: quality measurement of handle *Gong* 544
Clothing Patterns
grading of: AutoGrader system for basic block and adapted patterns *Liu, Harlock* 157
grading of: computer-aided grading system for basic block and adapted patterns *Liu, Harlock* 10
grading of: grading algorithm for basic block and adapted patterns *Liu, Harlock* 95
Coagulation
of acrylic blend fibers: diffusion and microporous structure *Qin, Liu, Pan, Li* 570
Collagens
for shrinkproofing wool: zero-AOX resin application for top and fabrics *Hesse, Thomas, Höcker* 371
Composites
cotton-poly knits: better dimensional stability and laundered appearance *Kimmel, Sawhney* 587
cotton-poly yarns: effect of oil on spread width *Wu, Lee* 343
cotton-poly yarn: effect of twist *Wu, Lee* 522
cotton-poly yarns: effects of spread width on structure, properties, production *Wu, Lee* 225
tandem spun: all-staple, core-wrap cotton-poly yarns *Sawhney, Kimmel* 550
Compression
of greystate polyester: handle as a function of yarn structure *Dupuis, Popov, Viallier* 309
Computer Techniques
cotton fiber selection: cotton mix variability, sources and factors affecting it *El Mogahzy, Gowayed* 75
cotton fiber selection: theory and practice, bale picking algorithms *El Mogahzy, Gowayed* 32
for fabric inspection: intelligent diagnosis system involving fuzzy logic *Lin, Lin, Tsai* 697
for pattern grading: AutoGrader system for basic block and adapted clothing patterns *Liu, Harlock* 157
for pattern grading: grading system for basic block and adapted clothing patterns *Liu, Harlock* 10
for pattern grading: grading system for basic block and adapted patterns *Liu, Harlock* 95
image analysis of blends: evaluation by line sense and application to actual blends *Watanabe, Konda, Kurosaki, Nishimura* 392
nonwoven fabric analysis: image analysis to measure characteristics of fiber segments *Xu, Ting* 41
to measure wool fiber diameter: optics of FDA using diffraction theory *Glass, Dabbs, Chudleigh* 85
to model carding: modeling and simulation for control *Gutierrez, Rust, Seyam* 638
to model drape: shear flexible shell theory *Chen, Govindaraj* 324
to predict color in blends: algorithm for optimizing matching *Amirshahi, Pailthorpe* 632
to study drape: fabric deformation study using nonlinear finite elements *Gan, Ly, Steven* 660
to study mispicks: discrete wavelet transform analysis *Jasper, Potlapalli* 683

woven fabric defects: defect detection and classification using image analysis *Zhang, Bresee* 1
Contaminants
in raw wool: automated color-sorting device for wool and other fibers *Abbott* 331
Cotton Fabrics
carboxymethylcellulose modified: pad roll technology to produce better properties *Rácz, Deák, Borsa* 348
cotton-poly composite knits: better dimensional stability and laundered appearance *Kimmel, Sawhney* 587
cotton/wool blends: effects of biofinishing with enzymes *Chikkodi, Khan, Mehta* 564
crosslinked with DMDMDHEU: water/methanol mixtures as solvents *Hsiung, Chen* 607
fabric appearance: Fourier transform analysis of plain weaves *Ravandi, Toriumi* 676
fiber hygroscopicity: perceptions of dampness in wool, cotton, polyester *Plante, Holcombe, Stephens* 293
heat and moisture transfer in: steaming of wool, cotton, nylon, polyester *Le, Ly, Postle* 203
mechanics of fancy fabrics: weavability limit parameters for yarns with thickness variation *Seyam, El-Shiekh* 14
mercerized: DRIFT spectroscopy and chemometrics study *Kokot, Stewart* 643
plain weft knits: degree and stability of flat set, effect of finishing *Phukan, Subramaniam* 471
water extraction from: performance of vacuum extractor, also polyester *Broadbent, Kong* 486
wrappers in fiber assemblies: steaming of blended and interleaved fabric-wrapper assemblies *Le, Tester, Buckenham, Postle* 265
Cotton Fibers
biodegradation of: also polypropylene *Goynes, Moreau, DeLucca, Ingber* 489
composite yarns: all-staple, core-wrap cotton-poly tandem spun yarns *Sawhney, Kimmel* 550
cotton/poly composite: effect of twist in spinning *Wu, Lee* 522
endotoxins in: reduction in dust from heated fibers *Rousselle, Chun* 501
engineered blends: cotton mix variability, sources and factors affecting it *El Mogahzy, Gowayed* 75
engineered blends: theory and practice of fiber selection, bale picking algorithms *El Mogahzy, Gowayed* 32
fractal dimension analysis of crimp: also wool, polyester *Muraoka, Inoue, Tagaya, Nishizawa* 454
low strength slivers: potential of false twist to help handle *Jeddi, Oxenham* 423
open-end friction spinning of: effects of opening roller speed on fiber and yarn properties *Ülkü, Özipek, Acar* ... 557
primary wall: TEM study comments *Boylston, Hebert* 429
secondary wall development: time versus thickness, a function of maturity *Goynes, Ingber, Triplett* 400
single fiber strength: developmental study of greenhouse grown Acala *Hsieh, Honik, Hartzell* 101
strength of: relation of single fiber and bundle strengths *Frydrych* 513
tensile properties: new single fiber tensile tester *Hebert, Thibodeaux, Shofner, Singletary, Patelke* 440
yarn strength: fiber properties and yarn strength relationship *Cheng, Adams* 495
Cotton Webs
foam application: bubble size distribution during application and effects on product quality *Isarin, Kaasjager, Holweg* 61
Cotton Yarns
cotton-poly composites: effects of spread width on structure, properties, production *Wu, Lee* 225
cotton-poly composites: effect of oil on spread width *Wu, Lee* 343
warp yarns: tensile properties and static fatigue behavior *Anandjiwala, Carmical, Goswami* 131
Cotton, Raw
microbial damage: review and evaluation of current tests *Allen, Auer, Pailthorpe* 379
motes and mote fibers: structures study using LM, TM, SEM *Goynes, Ingber, Thibodeaux* 219
Creep
in braided fiber seals: deformation behavior, nonlinear viscoelastic model *Cai* 461
in cotton warp yarns: tensile properties and static fatigue behavior *Anandjiwala, Carmical, Goswami* 131
Crimp
fractal dimension analysis: wool, cotton, polyester *Muraoka, Inoue, Tagaya, Nishizawa* 454
Cross-Sectional Areas
of fibrous materials: simple method of cross-sectioning for optical microscopy *Chen, Fujishige* 369
Crosslinking
of cotton with DMDMDHEU: water/methanol mixtures as solvents *Hsiung, Chen* 607
of PVA fibers: effects of water on high-strength, high modulus PVA fibers *Lin, Hwang, Lin* 278
silicones on wool: analysis by atomic absorption spectroscopy *Evans* 118

Decatizing
of wool fabrics: changes in chemical composition, effects on properties *Garcia, Postle, Pailthorpe* 477
Deformation
fabric drape: study using nonlinear finite elements *Gan, Ly, Steven* 660
in braided fiber seals: deformation behavior, nonlinear viscoelastic model *Cai* 461
in fiber assemblies: fiber contact, reply to comments *Pan* 618
of hybrid circular braid: elastic core, mechanics *Hopper, Grant, Popper* 709
of spinning travellers: analysis of forces generated during clipping of travellers onto rings *Sonntag* 178
roll-making operation: effect of varying fabric winding tension *Ghosh, Peng* 739
Diffusion
of acrylic blend fibers: microporous structure during coagulation process *Qin, Liu, Pan, Li* 570
Doffing
on roller card: torsional vibrations of roller card doffing comb *Stadnicki, Wojciech* 614
Drape
fabric deformation: study using nonlinear finite elements *Gan, Ly, Steven* 660
physically based model: shear flexible shell theory *Chen, Govindaraj* 324
Durable Press
crosslinking with DMDMDHEU: water/methanol mixtures as solvents *Hsiung, Chen* 607
Dyeing
changes in wool: effects of finishing and dyeing on properties *Garcia, Postle, Pailthorpe* 477
color prediction in blends: algorithm for optimizing matching *Amirshahi, Pailthorpe* 632
conductivity measurements: simple way to determine dye/surfactant interaction *Jocić* 409
disperse dyeing of wool: multilamellar liposomes as dye carriers *de la Maza, Manich, Coderch, Parra* 163
low chrome dyeing of wool: eliminating chromium residues in the exhausted bath *Xing, Pailthorpe* 70
of microbially damaged cotton: review and evaluation of current tests for damage *Allen, Auer, Pailthorpe* ... 379

of modified polyester: electrokinetics of easily dyed cationic dyeable fibers *Teli, Rao* 693
of polyamides: equilibrium sorption of polysulfonated acid dyes *Arora, McGregor* 385
of polyester: kinetics of disperse dyes at low temperatures *Carrión Fité* 362
of polyester fibers: zeta potential and sorption thermodynamics *Espinosa-Jiménez, Cano Suárez* 171
polyester microfibers: sorption isotherms and dyeing rates *Nakamura, Ohwaki, Shibusawa* 113
Dyes
photofading of: simulated evaluation of crystal violet on polymer substrates *Toda, Hida, Fukunishi* 507

Elasticity
fabric winding tension: roll-making operation *Ghosh, Peng* 739
in braided fiber seals: deformation behavior, nonlinear viscoelastic model *Cai* 461
of hybrid circular braid: elastic core, mechanics *Hopper, Grant, Popper* 709
Electrokinetics
of cationic dye on polyester: zeta potential and sorption thermodynamics *Espinosa-Jiménez, Cano-Suárez* 171
of dyeable polyester: easily dyed cationic dyeable fibers *Teli, Rao* 693
Environmental Impacts
low chrome dyeing of wool: eliminating chromium residues in the exhausted bath *Xing, Pailthorpe* 70
of polyester fiber finishing system: extracting and quantifying using on-line SFE/FT-IR with intermediate trapping *Jordan, Taylor, Seemuth* 230
of polypropylene geotextile: influence of waste polymer inclusion on performance *Horrocks, Richards, Ghosh* 601
of wool shrinkproofing: glow discharge zero-AOX treatment for top and fabric *Hesse, Thomas, Höcker* 355
of wool shrinkproofing: XPS study of fibers modified by gaseous fluorine *Kidd, Carr, Dodd, Vickerman, Byrne* 504
of wool shrinkproofing: zero-AOX collagen resin application for top and fabrics *Hesse, Thomas, Höcker* 371
Enzymes
biofinishing with: effects on cotton/wool blended fabrics *Chikkodi, Khan, Mehta* 564
on kenaf fibers: uniformity and softness of fibers for textile products *Ramaswamy, Craft, Wartelle* 765

Fabric Esthetics
cotton motes and mote fibers: structures study using LM, TM, SEM *Goynes, Ingber, Thibodeaux* 219
fabric defects: neural networks for pattern recognition of *Tsai, Lin, Lin* 123
fabric inspection: intelligent diagnosis system involving fuzzy logic *Lin, Lin, Tsai* 697
heat-set PET: influence of quaternary ammonium surfactant on alkaline hydrolysis *Niu, Wakida, Ogasawara, Fujimatsu, Takekoshi* 771
mispicks: discrete wavelet transform analysis *Jasper, Potlapalli* 683
plain weave appearance: Fourier transform analysis *Ravandi, Toriumi* 676
set marks: cloth fell displacement due to relaxation *Vangheluwe, Kiekens* 540
woven fabric defects: defect detection and classification using image analysis *Zhang, Bresee* 1
Fatigue
cotton warp yarns: tensile properties and static fatigue behavior *Anandjiwala, Carmical, Goswami* 131
of aramid nonwoven fabrics: fatigue behavior under hot-press conditions, mechanical properties *Watanabe, Miwa, Takeno, Yokoi* 213
of aramid nonwovens: geometric structure of fiber cross sections *Watanabe, Miwa, Takeno, Yokoi* 247
of polyester webbing: dynamic reciprocating bending fatigue tester *Bassam, Johnson* 49
of wool fabrics: surface attrition, geometric roughness and luster *Amirbayat, Bozzalta* 760
Fiber Properties
cotton single fiber strength: developmental study of greenhouse grown Acala *Hsieh, Honik, Hartzell* 101
Fiber Structure
cotton fiber maturity: secondary wall development, time versus thickness *Goynes, Ingber, Triplett* 400
Finishing
biofinishing with enzymes: effects on cotton/wool blends *Chikkodi, Khan, Mehta* 564
cotton with DMDMDHEU: water/methanol mixtures as solvents *Hsiung, Chen* 607
of plain weft knits: degree and stability of flat set, effect of finishing *Phukan, Subramaniam* 471
polyester fiber finishing: extracting and quantifying using on-line SFE/FT-IR with intermediate trapping *Jordan. Taylor, Seemuth* 230
superfinished wool: changes during dyeing and finishing, effects on properties *Garcia, Postle, Pailthorpe* 477
Flame Retardants
on acrylic fibers: effect of brominated retardants on fiber properties *Chou, Wu* 533
Fluorescence
to whiten wool: effect of antioxidants and quenchers on photoyellowing *Auer, Pailthorpe* 287
Foams
bubble size distribution: effects on product quality *Isarin, Kaasjager, Holweg* 61

Geometry
force geometric model: tensile properties of textured polyester woven fabrics *Salem, Johnson, Mohamed* 185
fractal: fiber crimp analysis by fractal dimension *Muraoka, Inoue, Tagaya, Nishizawa* 454
in OE spinning: influence of opening force on sliver separation *Nikolić, Bukošek* 652
of air-jet texturing nozzles: comments on *Chand* 555
of air-jet texturing nozzles: reply to comments *Acar, Versteeg* 556
of aramid nonwovens: structure of fiber cross sections and fatigue behavior *Watanabe, Miwa, Takeno, Yokoi* 247
of double-braided ropes: structural modeling of synthetic fiber ropes *Wu, Seo, Backer, Mandell* 619
of modeling drape: shear flexible shell theory *Chen, Govindaraj* 324
of spinning travellers: analysis of forces generated during clipping of travelers onto rings *Sonntag* 178
of woven fiber networks: asymptotic approximations used in failure modeling *Laumakis, Harlow* 731
of woven fiber networks: probability failure modeling of *Laumakis, Harlow* 254
surface attrition of wool: geometric roughness and luster of worsted fabrics *Amirbayat, Bozzalta* 760
Geotextiles
oriented polypropylene tapes: influence of waste polymer inclusion on performance *Horrocks, Richards, Ghosh* 601
Glow Discharge
wool shrinkproofing: zero-AOX treatment for top and fabric *Hesse, Thomas, Höcker* 355

Hair
amino acid composition of: principal components analysis *Wortmann, Wortmann, Zahn* 669
cell membrane lipids in: lipids of wool and hair form liposomes *Körner, Petrovic, Höcker* 56
Raman microprobe studies: structural information on constituent proteins *Jurdana, Ghiggino, Nugent* 593
Handle
as a function of yarn structure: compression of greystate polyester fabrics *Dupuis, Popov, Viallier* 309
of wool knits: quality measurement of apparel fabrics *Gong* 544
Heat Setting
of PET carpet yarn: determined with NIR *Dorrity, Kumar, Tincher* 583
of PET fibers: influence of quaternary ammonium surfactant on alkaline hydrolysis *Niu, Wakida, Ogasawara, Fujimatsu, Takekoshi* 771
Heat Transfer
in textile assemblies: steaming of blended and interleaved fabric-wrapper assemblies *Le, Tester, Buckenham, Postle* 265
in textile assemblies: steaming of wool, cotton, nylon, polyester fabric beds *Le, Ly, Postle* 203
Hygroscopicity
in wool, cotton, polyester: perceptions of dampness, subjective trials *Plante, Holcombe, Stephens* 293
in wool, polyester: perceptions of dampness, physical mechanisms *Li, Plante, Holcombe* 316

Image Analysis
fabric defects: neural networks for pattern recognition of *Tsai, Lin, Lin* 123
nonwoven fabrics: measuring structural characteristics of fiber segments *Xu, Ting* 41
of blend irregularity: evaluation by line sense and application to actual blends *Watanabe, Konda, Kurosaki, Nishimura* 392
of fabric appearance: Fourier transform analysis of plain weaves *Ravandi, Toriumi* 676
of foam application: bubble size distribution during application and effects on product quality *Isarin, Kaasjager, Holweg* 61
of mispicks: discrete wavelet transform analysis *Jasper, Potlapalli* 683
of wool fiber surfaces: scanning force microscope *Phillips, Horr, Huson, Turner, Shanks* 445
of wrinkling: digital image processing and replicate standards *Na, Pourdeyhimi* 149
woven fabric defects: defect detection and classification *Zhang, Bresee* 1
Infrared
of scoured wool: visible/near infrared spectroscopy to determine grease levels *Hammersley, Townsend, Grayston, Ranford* 241
to determine heat-set temperature: for PET carpet yarn *Dorrity, Kumar, Tincher* 583
to identify carboxycellulose: near-IR spectrophotometric technique for identification in linen *Kouznetsov, Ivanov* 236
Interlacing
of nylon: structure and properties *Miao, Soong* 433

Keratin
amino acid composition of: principal components analysis *Wortmann, Wortmann, Zahn* 669
cuticle surface of: response to comments *Denning, Guise, Evans, St John* 60
cuticle surface of: surface analysis using SSIMS and XPS *Peet, Wettenhall, Rivett* 58
Raman microprobe studies: structural information on constituent proteins *Jurdana, Ghiggino, Nugent* 593
Kinetics
of dyeing polyester: disperse dyeing at low temperatures *Carrión Fité* 362
of wool dyeing: multilamellar liposomes as dye carriers *de la Maza, Manich, Coderch, Parra* 163
Knits
flat set of: degree and stability of set, effect of finishing *Phukan, Subramaniam* 471
from cotton-poly composites: better dimensional stability and laundered appearance *Kimmel, Sawhney* 587
handle of wool knits: quality measurement of apparel fabrics *Gong* 544

Lasers
Raman microprobe studies: structural information on constituent proteins *Jurdana, Ghiggino, Nugent* 593
Light Phenomena
for evaluating raw wool: automated color-sorting device for wool and other fibers *Abbott* 331
Linen
carboxycellulose in: near-IR spectrophotometric technique for fast identification *Kouznetsov, Ivanov* 236
Lipids
for forming liposomes: cell membrane lipids from wool and hair *Körner, Petrovic, Höcker* 56
Liposomes
carriers of disperse dyes: multilamellar liposomes in wool dyeing *de la Maza, Manich, Coderch, Parra* 163
from wool and hair: cell membrane lipids form liposomes *Körner, Petrovic, Höcker* 56
Looms
needle loom: analysis of beat-up force during weaving *Shih, Mohamed, Bullerwell, Dao* 747
Luster
of worsted wool fabrics: surface attrition, geometric roughness *Amirbayat, Bozzalta* 760

Mathematical Analysis
braided fiber seals: deformation behavior, nonlinear viscoelastic model *Cai* 461
carding: modeling and simulation for control *Gutierrez, Rust, Seyam* 638
carding simulation: analysis of smoothing effect of card cylinder *Cherkassky* 723
clothing pattern grading: AutoGrader system for basic block and adapted patterns *Liu, Harlock* 157
clothing pattern grading : computer-aided grading system for basic block and adapted patterns *Liu, Harlock* 10
clothing pattern grading: grading algorithm for basic block and adapted patterns *Liu, Harlock* 95
color prediction in blends: algorithm for optimizing matching *Amirshahi, Pailthorpe* 632
cotton fiber selection: theory and practice, bale picking algorithms *El Mogahzy, Gowayed* 32
cotton fiber strength: relation of single fiber and bundle strengths *Frydrych* 513
doffing comb: torsional vibrations of roller card doffing comb *Stadnicki, Wojciech* 614
double-braided ropes: structural modeling of nylon and polyester ropes *Wu, Seo, Backer, Mandell* 619
fabric drape: fabric deformation study using nonlinear finite elements *Gan, Ly, Steven* 660
fabric drape: shear flexible shell theory *Chen, Govindaraj* 324

fabric mispicks: discrete wavelet transform analysis *Jasper, Potlapalli* 683
failure modeling: asymptotic approximations for woven fiber networks *Laumakis, Harlow* 731
fiber contact: in fiber assemblies, reply to comments *Pan* 618
fiber crimp: analysis by fractal dimension *Muraoka, Inoue, Tagaya, Nishizawa* 454
fiber hygroscopicity: perceptions of dampness in wool and polyester, physical mechanisms *Li, Plante, Holcombe* 316
heat and moisture transfer: steaming of wool, cotton, nylon, polyester fabric beds *Le, Ly, Postle* 203
hybrid circular braid: elastic core, mechanics *Hopper, Grant, Popper* 709
of cotton fiber blends: mix variability, sources and factors affecting it *El Mogahzy, Gowayed* 75
photofading of dye: simulated evaluation of crystal violet on polymer substrates *Toda, Hida, Fukunishi* 507
polyamide dyeing: dimensionless groups for equilibrium sorption of acid dyes *Arora, McGregor* 385
polyester handle: compression of greystate fabrics as a function of yarn structure *Dupuis, Popov, Viallier* 309
probability failure model: biaxially loaded woven fiber networks *Laumakis, Harlow* 254
ring spinning dynamics: inherent instability of free balloon *Batra, Ghosh, Zeng, Robert, Fraser* 417
roll-making operation: effect of varying fabric winding tension *Ghosh, Peng* 739
self-organizing neural nets: self-organizing nets to evaluate quality *Sette, Boullart, Kiekens* 196
sliver separation: influence of opening force during OE spinning *Nikolić, Bukošek* 652
textile assemblies: steaming of blended and interleaved fabric-wrapper assemblies *Le, Tester, Buckenham, Postle* 265
water extractor: performance of vacuum extractor, cotton, polyester *Broadbent, Kong* 486
winding tension variation: evaluation of compensation bar design *Miao* 427
winding tension variation: reply to comments *Falkner* 428
wool fiber diameter: optics of FDA using diffraction theory *Glass, Dabbs, Chudleigh* 85
wrinkling: digital image processing and replicate standards *Na, Pourdeyhimi* 149
yarn strength prediction: cotton fiber properties and yarn strength relationship *Cheng, Adams* 495
polyester textured fabrics: tensile properties, theoretical model for plain weave fabric *Salem, Johnson, Mohamed* 185

Mechanical Properties
aramid nonwoven fabrics: geometric structure of fiber cross sections and fatigue behavior *Watanabe, Miwa, Takeno, Yokoi* 247
cotton single fiber strength: developmental study of greenhouse grown Acala *Hsieh, Honik, Hartzell* 101
fancy cotton fabrics: weavability limit parameters for yarns with thickness variation *Seyam, El-Shiekh* 14
nonwoven fabrics: image analysis to measure characteristics of fiber segments *Xu, Ting* 41
of aramid nonwoven fabrics: fatigue behavior under hot-press conditions *Watanabe, Miwa, Takeno, Yokoi* 213
of cotton: relation of single fiber and bundle strengths *Frydrych* 513
of dyed and finished wool: changes in chemical composition, effects on properties *Garcia, Postle, Pailthorpe* 477
PAN precursor fibers: structure-property relationships during thermo-oxidative stabilization *Mukhopadhyay, Zhu* 25
PVA fibers: effects of water on high-strength, high-modulus fibers *Lin, Hwang, Lin* 278

Mercerization
exploratory study of: DRIFT spectroscopy and chemometrics study *Kokot, Stewart* 643
Microbes
on raw cotton: review and evaluation of current tests *Allen, Auer, Pailthorpe* 379
Microfibers
polyester: sorption isotherms and dyeing rates *Nakamura, Ohwaki, Shibusawa* 113
Microscopy
confocal laser Raman microprobe: structural information on constituent proteins *Jurdana, Ghiggino, Nugent* 593
cotton fiber maturity: secondary wall development, TEM and SEM study *Goynes, Ingber, Triplett* 400
of cotton fiber: TEM study of primary wall, comments *Boylston, Hebert* 429
of cotton motes and mote fibers: structures study using LM, TM, SEM *Goynes, Ingber, Thibodeaux* 219
optical: cross-sectioning of fibrous materials *Chen, Fujishige* 369
SFM and FeSEM: of wool fiber surfaces *Phillips, Horr, Huson, Turner, Shanks* 445
Moisture Transfer
in textile assemblies: steaming of blended and interleaved fabric-wrapper assemblies *Le, Tester, Buckenham, Postle* 265
in textile assemblies: steaming of wool, cotton, nylon, polyester fabric beds *Le, Ly, Postle* 203
in wool, cotton, polyester: fiber hygroscopicity and perceptions of dampness, subjective trials *Plante, Holcombe, Stephens* 293
in wool, polyester: perceptions of dampness, physical mechanisms *Li, Plante, Holcombe* 316

Neps
in air-jet texturing: formation mechanism *Sengupta, Kothari, Sensarma* 273
in textured polyester: nep level as index of structural inhomogeneity, also nylon *Kothari, Sengupta, Sensarma* 339
Neural Networks
for defect recognition: pattern recognition of fabric defects *Tsai, Lin, Lin* 123
self-organizing: new approach to quality in textiles *Sette, Boullart, Kiekens* 196
to predict yarn strength: cotton fiber properties and yarn strength relationship *Cheng, Adams* 495
Nonwovens
aramid fabrics: fatigue behavior under hot-press conditions, mechanical properties *Watanabe, Miwa, Takeno, Yokoi* 213
aramid fabrics: geometric structure of fiber cross sections *Watanabe, Miwa, Takeno, Yokoi* 247
biodeterioration of: cotton and polypropylene *Goynes, Moreau, DeLucca, Ingber* 489
structure of fiber segments: image analysis to measure characteristics *Xu, Ting* 41

Nylon
air interlaced: structure and properties *Miao, Soong* .. 433
air-jet textured yarns: nep level as index of structural inhomogeneity, also polyester *Kothari, Sengupta, Sensarma* 339
blend irregularity: image analysis evaluation of line sense *Watanabe, Konda, Kurosaki, Nishimura* 392
double-braided ropes: structural modeling of synthetic fiber ropes, also polyester *Wu, Seo, Backer, Mandell* ... 619
heat and moisture transfer in: steaming of wool, cotton, nylon, polyester fabric beds *Le, Ly, Postle* 203
photofading of dye on: simulated evaluation of crystal violet on polymer substrates *Toda, Hida, Fukunishi* 507

walking comfort of carpet: polyurethane underlayment *Norton, Fiest, Orofino* 527

Optics
cotton fiber cross sections: new single fiber tensile tester *Hebert, Thibodeaux, Shofner, Singletary, Patelke* ... 440
of wool fiber diameter analyzer: diffraction theory *Glass, Dabbs, Chudleigh* 85

Patterns
grading of: AutoGrader system for basic block and adapted patterns *Liu, Harlock* 157
grading of: computer-aided grading system for basic block and adapted patterns *Liu, Harlock* 10
grading of: grading algorithm for basic block and adapted patterns *Liu, Harlock* 95
Photodegradation
of crystal violet dye: simulated evaluation in polymer substrates *Toda, Hida, Fukunishi* 507
Poly(vinyl Alcohol)
crosslinked wet spun fibers: effects of water on high-strength, high-modulus fibers *Lin, Hwang, Lin* 278
Polyacrylonitrile
precursor fibers: structure-property relationships during thermo-oxidative stabilization *Mukhopadhyay, Zhu* 25
Polyamides
acid dye sorption: dimensionless groups for equilibrium sorption *Arora, McGregor* 385
Polyester
air-jet textured yarns: nep level as index of structural inhomogeneity, also nylon *Kothari, Sengupta, Sensarma* 339
carpet yarn: determining heat-set temperature with NIR *Dorrity, Kumar, Tincher* 583
cationic dye on fibers: zeta potential and sorption thermodynamics *Espinosa-Jiménez, Cano-Suárez* 171
composite yarns: all-staple, core-wrap cotton-poly tandem spun yarns *Sawhney, Kimmel* 550
cotton-poly composite: effect of twist in spinning *Wu, Lee* 522
cotton-poly composite knits: better dimensional stability and laundered appearance *Kimmel, Sawhney* 587
cotton-poly composite yarns: effects of spread width on structure, properties, production *Wu, Lee* 225
cotton-poly yarns: effect of oil on spread width *Wu, Lee* 343
disperse dyeing of: kinetics of dyeing at low temperatures *Carrión Fité* 362
double-braided ropes: structural modeling of synthetic fiber ropes, also nylon *Wu, Seo, Backer, Mandell* 619
dyeing microfibers: sorption isotherms and dyeing rates *Nakamura, Ohwaki, Shibusawa* 113
electrokinetics of: cationic dyeable PET *Teli, Rao* 693
fabric appearance: Fourier transform analysis of plain weaves: *Ravandi, Toriumi* 676
fiber finishing system: extracting and quantifying using on-line SFE/FT-IR with intermediate trapping *Jordan, Taylor, Seemuth* 230
fiber hygroscopicity: perceptions of dampness in wool, cotton, polyester *Plante, Holcombe, Stephens* 293
fractal dimension analysis of crimp: also wool, cotton *Muraoka, Inoue, Tagaya, Nishizawa* 454
handle of: compression of greystate fabrics as a function of yarn structure *Dupuis, Popov, Viallier* 309
heat and moisture transfer in: steaming of wool, cotton, nylon, polyester fabric beds *Le, Ly, Postle* 203
heat setting of: influence of quaternary ammonium surfactant on alkaline hydrolysis *Niu, Wakida, Ogasawara, Fujimatsu, Takekoshi* 771
hygroscopicity of: perceptions of dampness, physical mechanisms *Li, Plante, Holcombe* 316
neps in: formation mechanism in air-jet texturing *Sengupta, Kothari, Sensarma* 273
open-end friction spinning of: effects of opening roller speed on fiber and yarn properties *Ülkü, Özipek, Acar* ... 557
photofading of dye on: simulated evaluation of crystal violet on polymer substrates *Toda, Hida, Fukunishi* 507
plain weft knits: degree and stability of flat set, effect of finishing *Phukan, Subramaniam* 471
seat belt webbing: dynamic reciprocating bending fatigue testing *Bassam, Johnson* 49
textured woven fabrics: tensile properties, theoretical model for plain weave fabric *Salem, Johnson, Mohamed* 185
water extraction from: performance of vacuum extractor, also cotton *Broadbent, Kong* 486
Polypropylene
biodegradation of: also cotton *Goynes, Moreau, DeLucca, Ingber* 489
oriented geotextile tapes: influence of waste polymer inclusion on performance *Horrocks, Richards, Ghosh* 601
Polyurethane
carpet underlayment: perceived walking comfort *Norton, Fiest, Orofino* 527
Porosity
of cotton and polyester: liquid transport in fabric structures *Hsieh* 299
Probability
failure modeling: asymptotic approximations for woven fiber networks *Laumakis, Harlow* 731
failure modeling: biaxially loaded woven fiber networks *Laumakis, Harlow* 254
Proteins
silk proteins: structure and chemical composition as related to silkworm diet *Ito, Muraoka, Yamazaki, Imamura, Mori, Ichida, Sumida, Matusubara* 755
Pyrolysis
PAN precursor fibers: structure-property relationships during thermo-oxidative stabilization *Mukhopadhyay, Zhu* 25

Rayon
open-end friction spinning of: effects of opening roller speed on fiber and yarn properties *Ülkü, Özipek, Acar* ... 557
optical microscopy of: cross-sectioning of fibrous materials *Chen, Fujishige* 369
Relaxation
set marks from: test method for cloth fell displacement *Vangheluwe, Kiekens* 540
Resin Finishing
for shrinkproofing wool: zero-AOX collagen application for top and fabrics *Hesse, Thomas, Höcker* 371
Retting
of kenaf fibers: uniformity and softness of fibers for textile products *Ramaswamy, Craft, Wartelle* 765
Ropes
double-braided synthetics: structural modeling *Wu, Seo, Backer, Mandell* 619

Scanning Force Microscopy
of wool fiber surfaces: also FESEM image analysis *Phillips, Horr, Huson, Turner, Shanks* 445
Shrinkproofing
of wool by gaseous fluorine: XPS study *Kidd, Carr, Dodd, Vickerman, Byrne* 504
zero-AOX: collagen resin application for wool top and fabric *Hesse, Thomas, Höcker* 371
zero-AOX treatment of wool: glow discharge treatment *Hesse, Thomas, Höcker* 355

Silicones
crosslinked silicones on wool: analysis by atomic absorption spectroscopy *Evans* ... 118
Silk
silkworm diet: structure and chemical composition of proteins *Ito, Muraoka, Yamazaki, Imamura, Mori, Ichida, Sumida, Matsubara* ... 755
Sizing
on cotton warp yarns: tensile properties and static fatigue behavior *Anandjiwala, Carmical, Goswami* ... 131
Sliver
low strength: potential of false twist to help handle *Jeddi, Oxenham* ... 423
separation in spinning: influence of opening force during OE spinning *Nikolić, Bukošek* ... 652
Sorption
of polyester microfibers: sorption isotherms and dyeing rates *Nakamura, Ohwaki, Shibusawa* ... 113
Spectrophotometry
to identify carboxycellulose: near-IR technique for fast identification in linen fibers *Kouznetsov, Ivanov* ... 236
Spectroscopy
atomic absorption: analysis of crosslinked silicones on wool fabric *Evans* ... 118
DRIFT: and chemometric study of mercerized cottons *Kokot, Stewart* ... 643
of scoured wool: visible/near infrared to determine grease levels *Hammersley, Townsend, Grayston, Ranford* 241
Spinning
carding simulation: analysis of smoothing effect of card cylinder *Cherkassky* ... 723
dynamics of ring spinning: inherent instability of free balloon *Batra, Ghosh, Zeng, Robert, Fraser* ... 417
high speed ring spinning: analysis of forces generated during clipping of travelers onto rings *Sonntag* ... 178
of a composite yarn: twist in spinning a cotton/poly yarn *Wu, Lee* ... 522
of acrylic blend fibers: diffusion and microporous structure during coagulation process *Qin, Liu, Pan, Li* ... 570
of composite yarns: tandem spinning of all-staple, core-wrap cotton-poly yarns *Sawhney, Kimmel* ... 550
of cotton-poly composites: effect of oil on spread width *Wu, Lee* ... 343
of cotton-poly composite yarns: effects of spread width on structure, properties, production *Wu, Lee* ... 225
of flameproofed acrylics: effect of brominated retardants on viscosity and properties *Chou, Wu* ... 533
of low strength cotton slivers: potential of false twist to help handle *Jeddi, Oxenham* ... 423
of PVA fibers: effects of water on high-strength, high modulus PVA fibers *Lin, Hwang, Lin* ... 278
open-end friction spinning: effects of opening roller speed on fiber and yarn properties *Ülkü, Özipek, Acar* ... 557
sliver separation: influence of opening force on fiber geometry *Nikolić, Bukošek* ... 652
Statistical Techniques
amino acids in keratin: principal components analysis *Wortmann, Wortmann, Zahn* ... 669
carding simulation: analysis of smoothing effect of card cylinder *Cherkassky* ... 723
cotton fiber selection: cotton mix variability, sources and factors affecting it *El Mogahzy, Gowayed* ... 75
engineered cotton blends: theory and practice of fiber selection, bale picking algorithms *El Mogahzy, Gowayed* 32
failure modeling: asymptotic approximations for woven fiber networks *Laumakis, Harlow* ... 731
for defect detection: defect detection and classification using image analysis *Zhang, Bresee* ... 1
for yarn strength prediction: cotton fiber properties and yarn strength relationship *Cheng, Adams* ... 495
fuzzy clustering: DRIFT and chemometric study of mercerized cottons *Kokot, Stewart* ... 643
fuzzy set theory: intelligent diagnosis system for fabric inspection *Lin, Lin, Tsai* ... 697
mechanics of fancy fabrics: weavability limit parameters for yarns with thickness variation *Seyam, El-Shiekh* 14
modified cotton study: fibrous carboxymethylcellulose by pad roll technology *Rácz, Deák, Borsa* ... 348
probability failure model: biaxially loaded woven fiber networks *Laumakis, Harlow* ... 254
to analyze wrinkling: digital image processing and replicate standards *Na, Pourdeyhimi* ... 149
walking comfort of carpet: polyurethane underlayment *Norton, Fiest, Orofino* ... 527
Supercritical Fluids
polyester finishing system: extracting and quantifying using on-line SFE/FT-IR with intermediate trapping *Jordan, Taylor, Seemuth* ... 230
Surface Properties
of worsted wool fabrics: surface attrition, geometric roughness and luster *Amirbayat, Bozzalta* ... 760
Surfactants
dye/surfactant interaction: conductivity measurements, simple way to determine *Jocić* ... 409
quaternary ammonium: influence on alkaline hydrolysis of heat-set PET fibers *Niu, Wakida, Ogasawara, Fujimatsu, Takekoshi* ... 771
Tensile Properties
of aramid nonwoven fabrics: fatigue behavior under hot-press conditions *Watanabe, Miwa, Takeno, Yokoi* 213
of cotton warp yarns: and static fatigue behavior *Anandjiwala, Carmical, Goswami* ... 131
of hybrid circular braid: elastic core, mechanics *Hopper, Grant, Popper* ... 709
of polyester textured fabrics: theoretical model for plain weave fabric *Salem, Johnson, Mohamed* ... 185
of polypropylene geotextiles: influence of waste polymer inclusion on performance *Horrocks, Richards, Ghosh* 601
Tensile Testing
of cloth fell displacement: set marks caused by relaxation *Vangheluwe, Kiekens* ... 540
of cotton fibers: new single fiber tester *Hebert, Thibodeaux, Shofner, Singletary, Patelke* ... 440
Texture
of fabric defects: neural networks for pattern recognition of *Tsai, Lin, Lin* ... 123
polyester woven fabrics: tensile properties, theoretical model for plain weave fabric *Salem, Johnson, Mohamed* 185
Texturing
air-jet nozzles: comments on *Chand* ... 555
air-jet nozzles: reply to comments *Acar, Versteeg* ... 556
of polyester: nep formation mechanism *Sengupta, Kothari, Sensarma* ... 273
polyester and nylon yarns: nep level as index of structural inhomogeneity of air-jet textured yarns *Kothari, Sengupta, Sensarma* ... 339
Thermal Analysis
PAN precursor fibers: structure-property relationships during thermo-oxidative stabilization *Mukhopadhyay, Zhu* ... 25
Thermal Treatments
carboxycellulose in linen: near IR spectrophotometric technique for fast identification *Kouznetsov, Ivanov* 236
Thermodynamics
of cationic dye on polyester: zeta potential and sorption thermodynamics *Espinosa-Jiménez, Cano-Suárez* 171
Toxicity
of cotton fibers: endotoxin reduction in dust from heated fibers *Rousselle, Chun* ... 501

Twist
air interlaced nylon: structure and properties *Miao, Soong* 433
false twist: potential to help handle low strength cotton slivers *Jeddi, Oxenham* 423
in a composite yarn: effect of spinning of cotton/poly yarn *Wu, Lee* 522

Viscosity
of flameproofed acrylics: effect of brominated retardants on spinning and properties *Chou, Wu* 533
of foams: bubble size distribution during application and effects on product quality *Isarin, Kaasjager, Holweg* 61

Water Extraction
from fabrics: performance of vacuum extractor, cotton, polyester *Broadbent, Kong* 486
Weaving
beat-up force: influence of weaving parameters *Shih, Mohamed, Bullerwell, Dao* 747
fancy cotton fabrics: weavability limit parameters for yarns with thickness variation *Seyam, El-Shiekh* 14
on-line fabric inspection: intelligent diagnosis system involving fuzzy logic *Lin, Lin, Tsai* 697
set marks in: cloth fell displacement due to relaxation *Vangheluwe, Kiekens* 540
set marks in: self-organizing neural nets to evaluate textile quality *Sette, Boullart, Kiekens* 196
Webbing
seat belt webbing: dynamic reciprocating bending fatigue tester for polyester webbing *Bassam, Johnson* 49
Wettability
in fabric structures: liquid transport in cotton and polyester *Hsieh* 299
of modified cotton: fibrous carboxymethylcellulose by pad roll technology *Rácz, Deák, Borsa* 348
Winding
roll-making operation: effect of varying fabric winding tension *Ghosh, Peng* 739
tension variation: evaluation of compensation bar design *Miao* 427
tension variation: reply to comments *Falkner* 428
Wool Fabrics
changes during dyeing, finishing: effects on fabric properties *Garcia, Postle, Pailthorpe* 477
cotton/wool blends: effects of biofinishing with enzymes *Chikkodi, Khan, Mehta* 564
crosslinked silicones on: analysis by atomic absorption spectroscopy *Evans* 118
disperse dyeing of: multilamellar liposomes as dye carriers *de la Maza, Manich, Coderch, Parra* 163
fiber hygroscopicity: perceptions of dampness in wool, cotton, polyester *Plante, Holcombe, Stephens* 293
handle of knits: quality measurement of apparel fabrics *Gong* 544
heat and moisture transfer in: steaming of blended and interleaved fabric-wrapper assemblies *Le, Tester, Buckenham, Postle* 265
heat and moisture transfer in: steaming of wool, cotton, nylon, polyester *Le, Ly, Postle* 203
hygroscopicity of: perceptions of dampness, physical mechanisms *Li, Plante, Holcombe* 316
low chrome dyeing of: eliminating chromium residues in the exhausted bath *Xing, Pailthorpe* 70
photoyellowing of: effect of antioxidants and quenchers *Auer, Pailthorpe* 287
shrinkproofing of: glow discharge zero-AOX treatment for top and fabric *Hesse, Thomas, Höcker* 355
shrinkproofing of: zero-AOX collagen resin application for top and fabrics *Hesse, Thomas, Höcker* 371
surface attrition: effect of wear on geometric roughness and luster *Amirbayat, Bozzalta* 760
Wool Fibers
amino acid composition of: principal components analysis *Wortmann, Wortmann, Zahn* 669
cell membrane lipids in: lipids of wool and hair form liposomes *Körner, Petrovic, Höcker* 56
cuticle surface of: keratin surface analysis using SSIMS and XPS *Peet, Wettenhall, Rivett* 58
cuticle surface of: response to comments *Denning, Guise, Evans, St John* 60
fiber diameter analysis: optics of FDA using diffraction theory *Glass, Dabbs, Chudleigh* 85
fractal dimension analysis of crimp: also cotton, polyester *Muraoka, Inoue, Tagaya, Nishizawa* 454
grease levels in: visible/near infrared spectroscopy of scoured wool *Hammersley, Townsend, Grayston, Ranford* 241
Raman microprobe studies: structural information on constituent proteins *Jurdana, Ghiggino, Nugent* 593
shrinkproofed: XPS study of fibers modified by gaseous fluorine *Kidd, Carr, Dodd, Vickerman, Byrne* 504
surfaces of: image analysis with scanning force microscope *Phillips, Horr, Huson, Turner, Shanks* 445
Wool, Raw
color-sorting device for: detects stains, contaminants, faults *Abbott* 331
Wrinkling
analysis of: digital image processing and replicate standards *Na, Pourdeyhimi* 149

X-Ray Diffraction
of PVA fibers: effects of water on high-strength, high-modulus fibers *Lin, Hwang, Lin* 278
X-Ray Techniques
diffraction of silk proteins: structure and chemical composition as related to silkworm diet *Ito, Muraoka, Yamazaki, Imamura, Mori, Ichida, Sumida, Matsubara* 755
XPS study of wool: fibers modified by gaseous fluorine *Kidd, Carr, Dodd, Vickerman, Byrne* 504

Yarns
air interlaced nylon: structure and properties *Miao, Soong* 433
Yellowing
of whitened wool fabrics: effect of antioxidants and quenchers on photoyellowing *Auer, Pailthorpe* 287

Zeta Potential
of dyeable polyester: electrokinetics of modified PET *Teli, Rao* 693
